## Psych Meds:

A Review of Current Choices, Typical Uses, Benefits & Cautions

**Instructor:** Germaine D'Anniballe, ARNP

**Course Fee:** WSSCSW Members \$175

New Professionals \$150

Students \$125

Non-members \$200

**Continuing Education Credits:** 6 hours CE

**Course Size:** 20

**Requirements:** Open to all clinician levels

This course will be in four sessions. The first will discuss the use of medication in treating depression; the second, anxiety; the third, bipolar disorder; and the final class will look at medications that affect dopamine, how they are used and the neuro-chemical effects. There will also be discussion of risks, side effects, and drug interactions. The impact of the use of medication on the psychotherapeutic process will be addressed, as well as issues of collaboration between therapist and prescriber.

**Germaine D'Anniballe, ARNP**, received her BSN at Case Western Reserve University, 1980; MSN at University of Washington, 1992. Germaine is currently in private practice and is a clinical faculty member at the UW School of Nursing. Her previous work experience includes inpatient and outpatient nursing settings, i.e., emergency, intensive care, women's health, hospice care, and international health. Her psychiatric nursing experience has been inpatient and outpatient mental health facilities including Harborview and the HIV/AIDS clinic in Seattle/King County Public Health.
